ThermoSoft Proposes Radiant Floor Heat for Global Peace

Coming off the coldest winter in ThermoSoft's history, ThermoSoft is redoubling efforts to focus the attention of world leaders on the benefits of global electric radiant floor heat. ThermoSoft's mission is to warm the world and thereby make our globe more comfortable and peaceful.

Thermal dynamics experts state the problem of global convection heating must be overcome. Settled science shows that when the furnace kicks on it is loud enough to wake up resting citizens. Other downsides of convection heating, proven by consensus, are that the blower feels drafty and spreads dust, dirt and allergens around the home. Add to that the unwelcome thoughts when awakened about one's investment in warm air rising to the ceiling where it's wasted. It's a wonder how anyone can sleep at all without floor warming.

It's a fact that less sleep makes people irritable, aggressive and inclined to reassert territorial claims. What is going on in Ukraine and Russia today can be explained by the lack of modern, energy saving, radiant floor heat which is taken for granted in the West because of its availability and affordability. Floor warming is soothing, cozy, calming, energy-saving, and more comfortable mainly because it is attracted to people and objects. Radiant floor heat does not rise to the ceiling like convection heat. The thermal dynamics of radiant heat reduce building heat loads by 25-35% according to the American Society of Heating, Refrigeration and Air Conditioning Engineers. What's more, ThermoSoft's in-floor warming systems eliminate wasting energy up to 35% that is lost in central heating duct work according to the U.S. Department of Energy.

Freedom loving people have the right to enjoy the soothing comfort of electric floor warming that is easy to install, energy saving, healthy and above all more comfortable. ThermoSoft is adding its voice to the demands that our government provide help to Ukraine. However, rather than sending money that will likely end up in the wrong hands, ThermoSoft advocates procuring and shipping boatloads of electric floor warming systems.

Homeowners, professional installers and government procurement officers can conveniently shop ThermoSoft's secure and verified website that reliably operates 24/7/365. Many buyers prefer to call ThermoSoft's toll-free "heatline" to speak with knowledgeable and trusted professionals to help them navigate various in-floor warming options. ThermoSoft's candid, informative and respectful sales representatives are standing by to answer radiant floor heat and installation questions by phone, email or by chat. ThermoSoft offers a 100% money back guarantee.

ThermoSoft International Corporation is the leading, fully integrated, USA manufacturer of UL and ETL/Intertek compliant in floor warming systems that are easy-to-install, affordable and green, saving energy up to 40%. ThermoSoft provides its systems for installation under almost

any type of floor covering. Same day shipping, lifetime warranty, toll-free installation and lifetime technical support are provided for ThermoSoft's radiant floor heat systems. For more information, visit: <http://www.thermosoft.com>.
